

TRACKER CG-30

Single Head Straight Line Gas Cutting Machine

The TRACKER CG30 is a step-less variable speed carriage with oxy/fuel gas cutting torch mounted on a straight line track. Built to industrial standards the TRACKER CG30 provides high quality oxy/fuel cuts on steel plates and structures where straight line accuracy is paramount. With addition of the CG30 Circle Cutting Attachment the CG30 will cut circles with a high degree of accuracy.

The TRACKER CG30 is the low cost, high quality, value alternative. It is known around the world as one of the best portable cutting machines in the industry..

XG-CG30

Technical Data
